

efficiency. synergy. expertise.

"...eTeam believes in partnering itself in the whole process of the projects, which gives them an edge over other consulting organizations. This has been proven by the efforts, sincerity, dedication and hard work of their consultants in mission critical projects..."

— Vice President, Information Systems

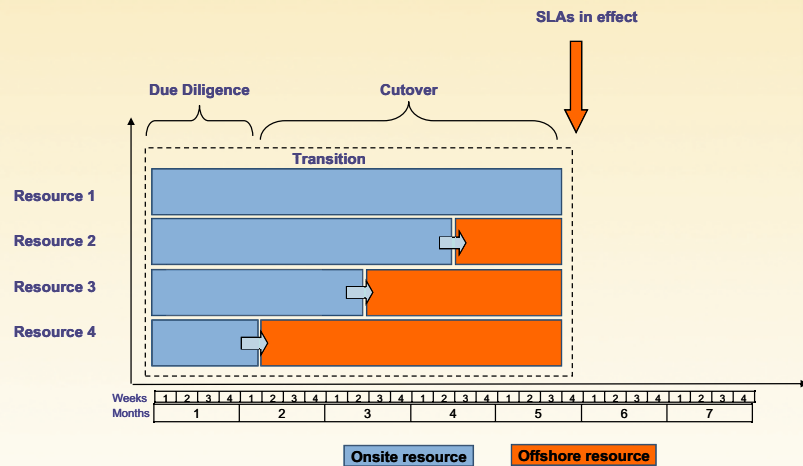

eTeam delivers the full-scope of application management services you need to derive maximum value from your SAP solutions. Our experts can provide timely, comprehensive, on-demand, and integrated support by leveraging flexible delivery models and industry best practices.

SAP Application Management

eTeam offers the support needed to manage and continuously improve existing solutions, providing organizations with the freedom they require to focus on their core business activities.

Whether you are in the process of implementing a SAP solution or have an existing SAP solution, eTeam has a focused and structured approach to solving critical and time-sensitive issues.

For SAP customer that are in the process of implementing SAP Solutions, eTeam can partner with you early during the cutover phase, get the knowledge transfer from the implementation team with minimal impact and be ready with seamless post implementation services right after go-live.

Release Upgrades

eTeam can help you understand the path that SAP is taking with their solutions to develop a solid business case and a more realistic upgrade strategy.

eTeam's highly skilled pool of consultants has deep experience in upgrades — including functional and strategic upgrades. The experience derived from the previous upgrades has created a remarkable knowledge

base within the organization. eTeam's upgrade experts are armed with reusable templates like Upgrade Project Plans,

Cutover plans, Test Scripts, End-to-End scripts and checklists. Customers have the flexibility to leverage several delivery models including the trained and experienced offshore resources that can deliver the upgrade remotely using proven processes.

PLANNING

Define transition / upgrade strategy and project plan

BUILDING

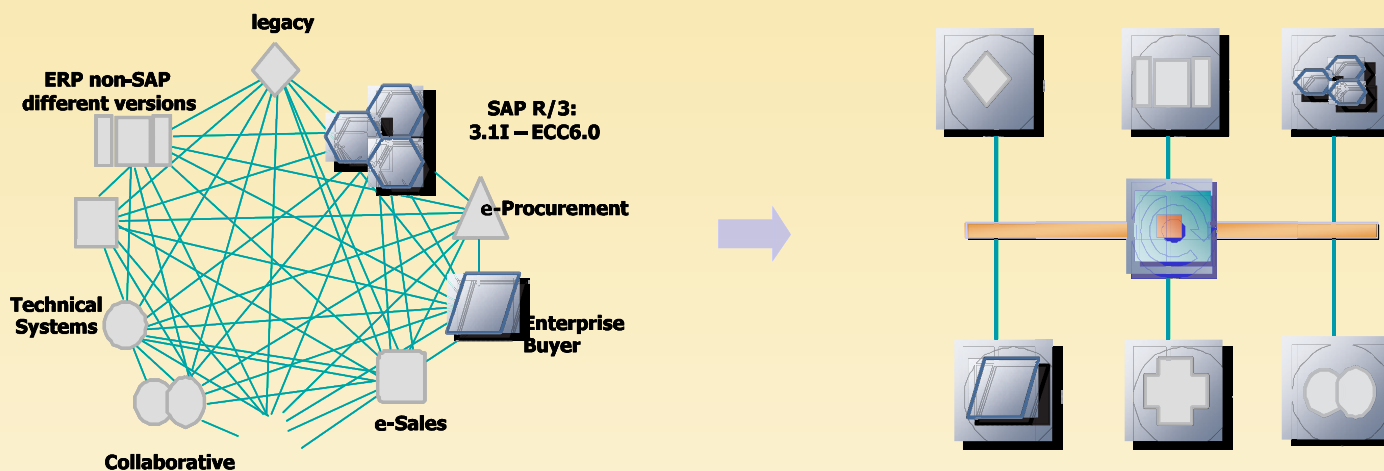

Minimize project costs and risk of business disruption

RUNNING

Run and incrementally improve total cost and value

Enterprise Application Integration

eTeam experts play a key role in transforming heterogeneous, detached enterprise IT landscape into an integrated IT architecture capable of delivering business value to enterprise operations. eTeam has the vast experience to solve the most complex EAI challenges in the selection and standardization of key middleware and integration with industry proven products. Thus building the foundation that can be leveraged to enhance business processes.

Continuous Business Improvement

Our continuous services include break fixes, functional enhancements, report generations, performance tuning, and regular system health checks. eTeam workforce is extensively experienced in developing custom solutions, we have expert development architects, project managers, and developers positioned worldwide. Our experts can deliver the quick, flexible, and safe services you need to gain the high-quality, individualized business solutions you require to efficiently seize new marketplace opportunities and dynamically respond to emerging business challenges.
